

Want more... PERSONAL INJURY PATIENTS?

The thing capping your PI volume usually isn't demand — it's cash flow.

Fund the receivable up front and grow personal-injury volume through your own added capacity.

Every personal-injury patient is care delivered months or years before the case settles. That gap forces many practices to limit how much PI they take on. IPV removes the constraint: with receivables funded up front, you can add the staff and space to see more patients.

WHY PROVIDERS JOIN

Reliable cash flow

Predictable capital for payroll, rent and growth — instead of waiting on settlements.

Liquidity in days

Capital against your PI receivables fast — not after the case resolves.

Grow your practice

Reinvest freed-up capital into staff, space and equipment to take on more cases.

Scale without strain

More PI volume no longer means a growing pile of unpaid, aging receivables.

Grow your PI practice today.
Put your A/R to work with our provider-funding team.
