

THE PROBLEM

Your A/R is working against you.

You've treated the patient and earned the revenue — but the money is locked up until the case settles. **That's cash you can't use.**

- **6–36 month** waits on settlement.
- **Cash tied up** in aging PI receivables.
- **Collection risk** and admin drag.
- **Hard to grow** with capital frozen.

6–36_{mo}

TYPICAL SETTLEMENT WAIT

THE SOLUTION

Turn receivables into cash now.

IPV advances against, or buys outright, your personal-injury medical receivables — so you get paid in days, not years.

- ✓ **Liquidity in days**, not years.
- ✓ **Advance or sell** — your choice.
- ✓ **Keep the upside** that fits your practice.
- ✓ **We manage** the file to settlement.

Days

TO LIQUIDITY, NOT YEARS

THE UPSIDE

More patients, less strain.

Put your A/R to work and take on more personal-injury patients — **paid for now**, with collection handled.

- **More capacity** to grow your practice.
- **Reliable cash flow** instead of long waits.
- **No out-of-pocket cost** to patients.
- **Treat more PI** patients with confidence.
